EDUCATION

Oriental College of Technology, Bhopal, India Currently in 3rd Year Sept 2023- Present
B.Tech – Computer Science (AI & ML) | CGPA: 7.22/10.0
GCM Convent School, Nowgong, Madhya Pradesh Class 12 | 82%

TECHNICAL SKILLS

Programming & Querying: Python, SQL, Data Extraction, Data Manipulation, Filtering, Sorting, Aggregation
Data Analysis & Excel: Pandas, NumPy, Microsoft Excel (VLOOKUP, XLOOKUP, Pivot Tables), Data Cleaning, Data Pre-processing, Missing-Value Handling, Data Validation, Exploratory Data Analysis (EDA), Descriptive Analysis, Trend & Pattern Analysis, Data Formatting, Data Summarization
Business & Reporting: KPI Analysis, Performance Analysis, Business Insights, Data-Driven Decision Making, Business Reporting, Performance Reporting, Trend Analysis
Data Visualization: Power BI, Dashboard Development, KPI Dashboards, Data Visualization
Machine Learning: Machine Learning, Deep Learning, Image Classification, Transfer Learning, Fine-Tuning, Data Augmentation, Model Training, Model Evaluation
Tools & AI: Jupyter Notebook, TensorFlow, Keras, GenAI, Prompt Engineering

PROFESSIONAL EXPERIENCE

Bluestock Fintech | Data Analytics Intern May 2026 – July 2026

1. Nifty100 Financial Intelligence Platform

- Integrated **12 Excel datasets** through an ETL pipeline using **Python, Pandas & SQLite**.
- Developed **9+ financial KPIs** including ROE, margins, Debt-to-Equity, EPS and Free Cash Flow, with **4 stock-screening categories**.
- Built a **Streamlit + Plotly** dashboard with company ranking and **5-level** rule-based recommendations (Strong Buy to Strong Sell).

2. Bluestock — Mutual Fund Analytics

- Integrated and analyzed **10 datasets** covering NAV, funds, transactions, SIPs, holdings, benchmarks, folios and AUM.
- Evaluated fund performance using **6+ metrics**, including CAGR, Annualized Return, Volatility, Sharpe Ratio, Maximum Drawdown and Daily Returns.
- Performed advanced risk analysis using **VaR, CVaR, 90-day Rolling Sharpe Ratio and HHI**, and built a **Power BI** dashboard.

GenZ Educatewing | Business Analyst Intern

June 2026 – July 2026

1. Customer Churn Analysis

- Analyzed 7,043 customers, identifying 26.53% overall churn and 42.71% Month-to-Month churn.
- Identified Fiber Optic customers with 41.89% churn and the highest-risk segment — Month-to-Month + Fiber Optic + No Tech Support (~57%).
- Created multiple visualizations to analyze churn by contract, internet service, tenure, payment method, and customer characteristics.

Codec Technologies | Machine Learning Internship

Oct 2025 – Nov 2025

- Assisted with model training, testing, and evaluation activities.
- Worked with datasets to understand data preprocessing and validation techniques.
- Applied machine learning concepts to practical AI-based projects.

PROJECTS

AI-Based Garbage Segregation System

Oct 2025 – Jan 2026

- Developed a deep learning-based image classification system using **MobileNetV3-Large** to classify waste into **6 categories**.
- Prepared and trained the model on **15,135 images** using an **80:20 train-validation split**, including image resizing, normalization, and augmentation.
- Applied **transfer learning and fine-tuning**, achieving approximately **91–92% validation accuracy**.
- Evaluated predictions using **precision, recall, F1-score, and confusion matrix**, while analysing prediction confidence and misclassification patterns.

CERTIFICATIONS

- Deloitte Data Analytics Virtual Experience:** Completed practical tasks involving data analysis, visualization etc.
- Data Analytics Using Excel – Coursera** Learned Excel-based data cleaning, analysis, formulas, and data visualization.
- SQL for Data Analysis – HackerRank:** Practiced SQL queries for filtering, aggregation, data manipulation, and analysis.
